

## Sycamore Home Learning

We understand that it might be difficult to work from home and carry out school work, so we have tried to make this list of ideas as flexible as possible. We thought of some of the ideas together

### Maths

Children are encouraged to practise their times tables daily, this could be through TT Rock Stars, Squeebles, or playing games both online and paper for example making a 'snap' style or memory game. Please practise the 2, 5 and 10 times tables in particular. Year 2 will also need to know 3 times table. This is a great opportunity to learn to tell the time – you can link this to the 5 times table, halves and quarters. Making your own clock is a great idea. Learning about money and setting up a shop.

Classroom Secrets is a brand new site packed full of activities for children to use independently. These activities are maths, reading and grammar based, so cover a wide range of activities.

### Spellings

We have added a list of Year One and Two words to the spellings books. Practice reading and spelling these and use it as a guide for their own writing.

### Creating

Children are encouraged to draw/paint/ sketch anything they are interested in – it would be really nice to keep a sketchbook. Children could create a poem, rap or song linked to something they enjoy. They could create their own book or comic – linked to our Traction Man story or their favourite super heroes or character.

### Science

We are learning about scientists and inventors. With a particular focus on Materials. Can you find out who invented LEGO and make a poster about it? What was the invention of Charles Mackintosh?

What are the best materials to make a boat? Can you make a boat that floats? Can you explore materials that float or sink?

Any kind of cooking is brilliant science!

There are lots of good websites and apps children are able to use for free. This will allow the children to work independently on a variety of subject areas.
